[Portfolio](#) | [GitHub](#) | [Linkedin](#)

Career Objective

Detail-oriented and passionate Full-Stack Developer with hands-on experience in building secure, scalable, and high-performance web applications. Skilled in both front-end and back-end development, with a focus on delivering seamless user experiences and robust system architecture. Committed to continuous learning and contributing to impactful projects within dynamic, collaborative environments.

My Profile:

- **Experience Level:** Frontend Developer Intern | Itransition Chattogram, Bangladesh (On Site) 2025-2026

Skills

Front-End: HTML5 | CSS3 | Tailwind CSS | Bootstrap | JavaScript (ES6+) | React.js | Next.js | TypeScript

Back-End: Node.js | Express.js | GO | .NET | PHP | REST API | JWT

DataBase: PostgreSQL | SQL Server | MongoDB | Mongoose | MySQL

Tools & Technologies: Prisma | Docker & Nginx | AWS | Vercel | Ai | Git | GitHub | VS Code | Postman | Figma

Projects

1. FoodHub: Multi-Vendor Meal Ordering System

[Live Link](#) | [Client Code](#) | [Server Code](#)

Description:

Architected a multi-vendor food delivery ecosystem that streamlines vendor onboarding, role-specific account management, and real-time order tracking.

Key Features:

- Implemented secure JWT authentication and Role-Based Access Control (RBAC) using Next.js Server Actions to eliminate unauthorized data access across Customer, Provider, and Admin portals.
- Developed an automated Admin control panel with Prisma ORM and PostgreSQL to streamline provider verification workflows and centralized category management.
- Optimized frontend state synchronization and order lifecycle tracking using TanStack Query and shadcn/ui to deliver an intuitive, low-latency client experience.

Tech Stack:

Frontend: Next.js 16, TypeScript, Tailwind CSS, TanStack Query, shadcn/ui | Backend: Node.js, Express.js | Database: PostgreSQL, Prisma ORM | Others: JWT, Role-Based Access Control (RBAC)

2. Planora: Comprehensive Event Management Platform

[Live Link](#) | [Client Code](#) | [Server Code](#)

Description:

Engineered an end-to-end event hosting SaaS that automates public/private event publishing, user moderation, and paid ticketing workflows.

Key Features:

- Integrated Stripe Payment Gateway with automated joining workflows to process ticket transactions securely across public and private events.
- Built centralized host approval engines and moderation dashboards using Next.js Server Actions and Prisma ORM for real-time activity tracking.
- Enhanced interface reliability and user engagement by implementing custom dynamic loading/error states and an interactive review system with Tailwind CSS and shadcn/ui.

Tech Stack:

Frontend: Next.js 16, TypeScript, Tailwind CSS, TanStack Query, shadcn/ui | Backend: Node.js, Express.js, Next.js Server Actions | Database: PostgreSQL, Prisma ORM | Others: Stripe API, JWT, RBAC

Courses & Certifications

- [Next Level Web Development Course From Programming Hero (Level-2)] Batch-6, 2026 [View](#)
- [Diploma in Information and Communication Technology (DICT) (312Hr)] Batch-25, 2025 [View](#)
